Title

Green Tea 「Made in Kyoto」

Related issues about testing

Test sample name	Green Tea 「Made in Kyoto」
Category of test sample	-
Received date of test sample	5-Jun-2019
Compliance with requirements and/or specifications	<input checked="" type="checkbox"/> Compliance • <input type="checkbox"/> Non-Compliance
Deviations from normal test condition	<input checked="" type="checkbox"/> Non-Problem • <input type="checkbox"/> Problem ()
Other issues	Extraction method: Tea leaves(more than 10g) were extracted by heated water(90 degrees Celsius) of 30 times the amount of tea leaves, for 60 seconds. After that, the extracted tea samples were filtered with a 40-mesh sieve.

1. Test item and result

Test item	Result	Detection limit	Measurement date
IODINE-131	Not detected	1 Bq/kg	5-Jun-2019
CESIUM-134	Not detected	1 Bq/kg	5-Jun-2019
CESIUM-137	Not detected	1 Bq/kg	5-Jun-2019

Result: Result on the measurement date

Detection limit: On basis of the method of calculation of detection limit issued in "gamma-ray spectrometry by germanium semiconductor detector" which is series No.7 Method of Radiation Measurement, published and revised by Ministry of Education, Culture, Sports, Science and Technology (1992).

2. Test methods

Measurement with gamma-ray spectrometry using germanium semiconductor detector

Measurement time : 2000 seconds

Tested parts : Whole

Cleaning of test sample : None

3. Special notes

The result of this report is only applied on this specific test sample.

It shall be prohibited to reproduce any part of this report without our written approval.
